About TUMS

TUMS traces its roots back to 1851, as part of the Institute for Higher Education (*Dar-al-fonun*). The School of Medicine, as the first school of University of Tehran, was established in 1934 and in 1986, all medical schools carried on their activities independently as Tehran University of Medical Sciences.

TUMS is the oldest and the most well-known international medical center in Iran. With 121 research centers and around 2,610 faculty members, TUMS educates about 14,000 students annually in various levels and majors. We have 10 schools, namely Allied Medical Sciences, Advanced Technologies in Medicine, Dentistry, Medicine, Nutritional Sciences & Dietetics, Nursing and Midwifery, Pharmacy, Public Health, Rehabilitation, and Persian Medicine and TUMS Kish and Abadan International Campuses. This university enjoys having 17 teaching and treatment hospitals, providing students with ample opportunities to put their knowledge into practice.

TUMS has received the first rank among the universities of medical sciences in Iran for many years. Also, it has proved itself in the international arena, receiving notable ranks in the region, in Asia and around the world.

Tehran University of Medical Sciences

History

The first modern center of medical training & education in Iran, *Dar-al-fonun*, was founded in 1851. The name of the center was changed to University of Tehran in 1934. Since 1986, all schools in medical fields have carried on their activities independently as Tehran University of Medical Sciences and Health Services.

The Oldest

TUMS is the oldest and the most well-known medical & educational center in Iran, nationally as well as internationally. TUMS, as the country's top research university, accepts applications from the most qualified students.

The Largest

TUMS also has the largest schools of medicine, dentistry, pharmacy, rehabilitation, allied medical sciences, public health, advanced technologies in medicine, nutritional sciences and dietetics, Persian medicine, and nursing and midwifery in the country.

Research

TUMS identifies and considers research areas for development, especially in response to the national, regional and international demands and with respect to the establishment of centers and interdisciplinary programs.

International

TUMS contributes to international medical and health education, research and professionalism to the benefit of the global community through the exchange of knowledge, sharing of resources, and developing global cooperation and collaboration.
