

In the Name of God

Islamic Republic of Iran Ministry of Health and Medical Education Deputy for Education

Psychiatric Nursing **Degree: Master of Science (MSc)**

Total Course Credits

- Core: 28
- Noncore: 4
- Thesis: 4

Program Description

The Psychiatric Nursing program is intended to train knowledgeable and skillful nurses, within the framework of health-centered, community-oriented, and comprehensive policies, to promote community health quality. The program could combine nursing knowledge with other health-related disciplines to achieve better outcome. The graduates, in this field, are armed with problem-solving skills and evidence-based decision-making abilities to offer optimum care to those in need.

The graduates can fulfill various tasks at such different settings as healthcare, rehabilitation, asylum, addiction, and consultation centers, hospitals, psychiatric clinics, psychiatric emergency wards, schools, and other settings in need of psychiatric nurses. They have the necessary knowledge, skill and dexterity to offer proper services, at different stages of prevention and treatment, to the mentally ill, their families and those with learning or other mental disabilities.

The universities and faculties in Iran, offering the program since 1974, have accumulated a wealth of invaluable experience. They accordingly have updated the course curriculum for MS degree to meet the changing needs of those with mental discomforts. This helps the graduates more effectively meet the psychiatric needs of their patients.

Admission Requirements

- Having a bachelor's degree (BSc) in nursing
- Meeting admission criteria based on the regulations of universities
- Being eligible for entering the program

*Important note: These general conditions do not necessarily exclude specific conditions of each specific institute or university.

Expected Competencies at the End of the Program

General Competencies*
