Health Education and Health Promotion

Degree: Master of Science (MSc)

Total Corse Credits

- Compensatory:
- Core:20
- Non-core (Electives):6
- Thesis:6

Program Description

Students will acquire the knowledge and skills to identify the determinants of health and designing, implementation and evaluating health-related program. They help in enabling all people to improve their health.

Health Education and Health Promotion construct opportunities for learning some form of communication designed to improve health literacy, improving knowledge, and developing life skills which are conducive to individual and community health. Health education is not only concerned with the communication of information, but also with fostering motivation and skills necessary to improve health.

The course is intended to achieve the following goals:

- Designing, managing and promoting health improvement programs
- Raising awareness of good health, diet and exercise through training and workshops
- Changing the behaviors of individual or social groups
- Improving quality of life for people in the community

Admission Requirements

- Having a bachelor's degree (BSc) in health education and health promotion
- Meeting admission criteria based on regulations of universities
- Being eligible for entering the program
