- Thesis: ۷

Program Description

MSc. graduates will be able to provide services to the community in different fields such as medical diagnosis, evaluations related to organ transplantation, blood transfusion, cancer, allergy, autoimmune diseases, vaccine design and stem cell based immunotherapy.

Field of Immunology is a branch of medical sciences. In this science, the mechanisms of physiologic hemostasis, immune surveillance and the host defense against infectious agents are studied. In addition, molecular mechanisms underlying immune responses and disease onset are broadly discussed.

Future prospect of the field by the next ۱۰ years would be the improvement of educational standards, research products and providing diagnostic and health care services concerning medical immunology. The main mission of the course is training committed, knowledgeable and skilled graduates in the field of medical Immunology.

Admission Requirements

- Having a bachelor's degree (BSc) in Medical Immunology
- Meeting admission criteria based on regulations of universities
- Being eligible for entering the program

Expected Competencies at the End of the Program

General Competencies*

Specific Competencies and Skills

- At the end of the program learners will be competent in the following skills:
 - Performing experiments
 - Working in professional environments
 - Having skills in handling animals
 - Making a healthy and safe environment in both physical and psychological aspects
 - Using specialized equipment
 - Calibrating common measurements and equipment
 - Having ability in quality control

Educational Strategies, Methods and Techniques*

Student Assessment (Types and Methods)

- Formative (Quizzes and Midterm Exam)
- Summative (Final Exam)
- Oral and written exams, observation, clinical competence assessments ▪ (OSCE, OSLE, OSFE, DOPS, ۳۶۰ degree evaluation competency)
- Portfolio assessment: Log book, test results, reports, articles, certificates, promotion, etc.
