Register Cancel

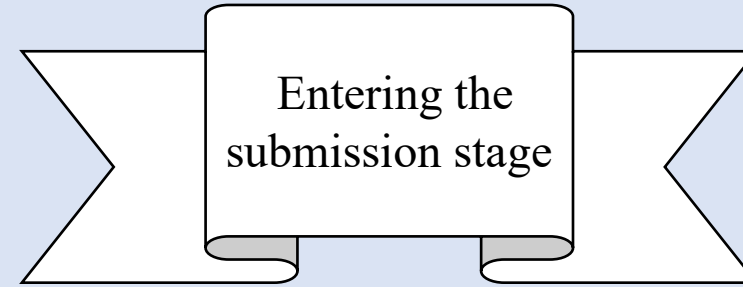

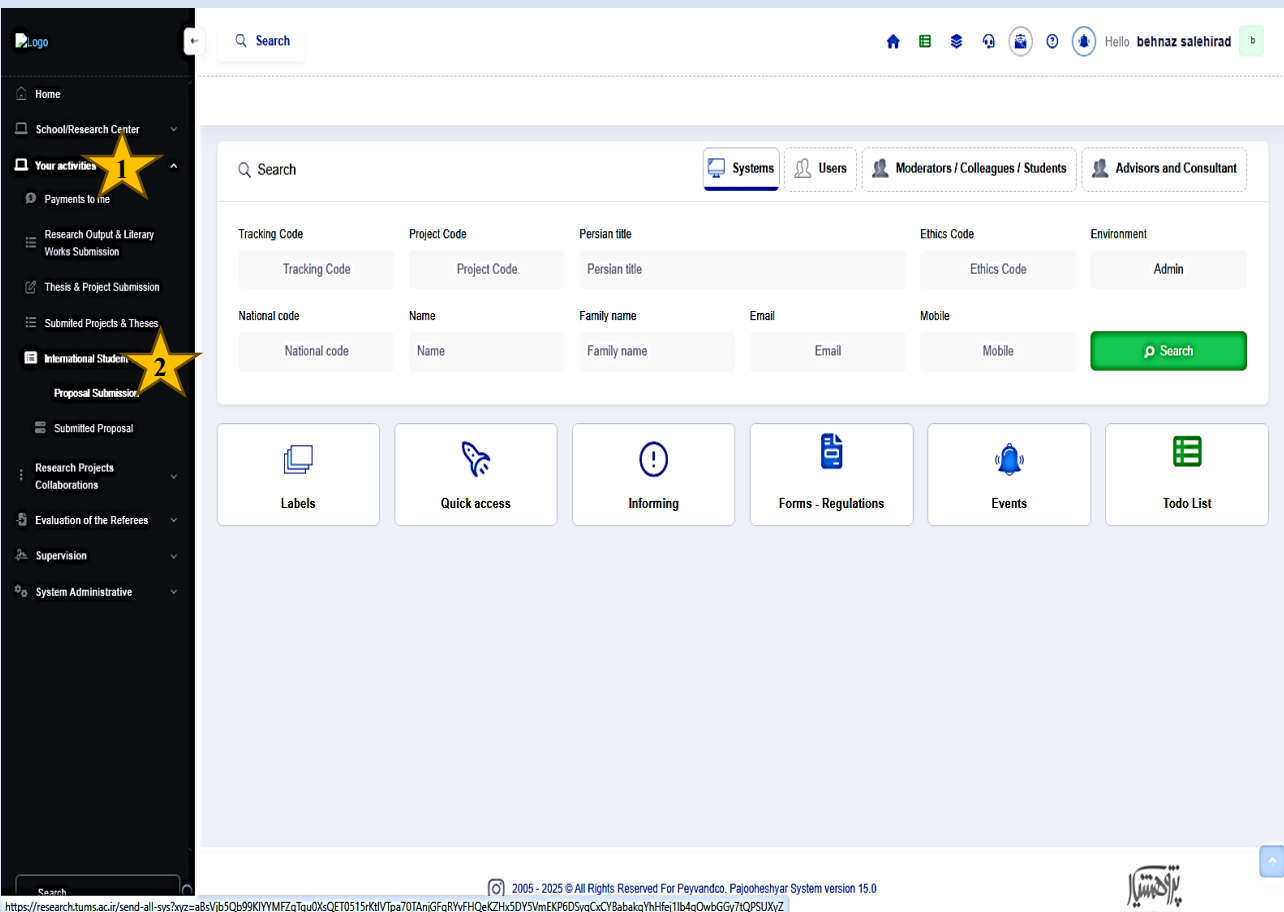

In the **Inclusive code/Passport number** box, type your passport number without the letter.

Select your school as your first target.

- Note 2:** Make sure to type your **Iranian cell phone number** in the mobile box. example: 09122323234, without (+98).
- Note 3:** Do not lose your cell phone number before completing your degree. If you forget your password, you will need your cell phone number to recover it.
- Note 4:** New Route PhD students must select **International Campus (IC) – Research Affairs** As their first target.

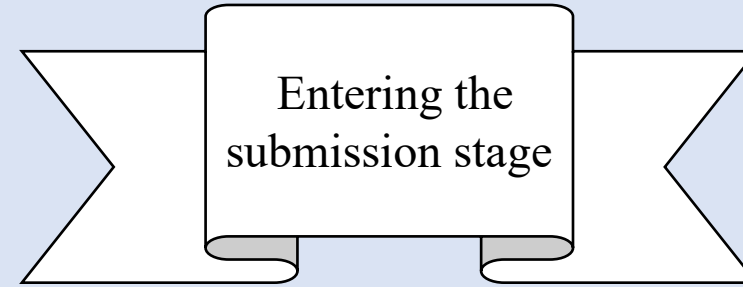

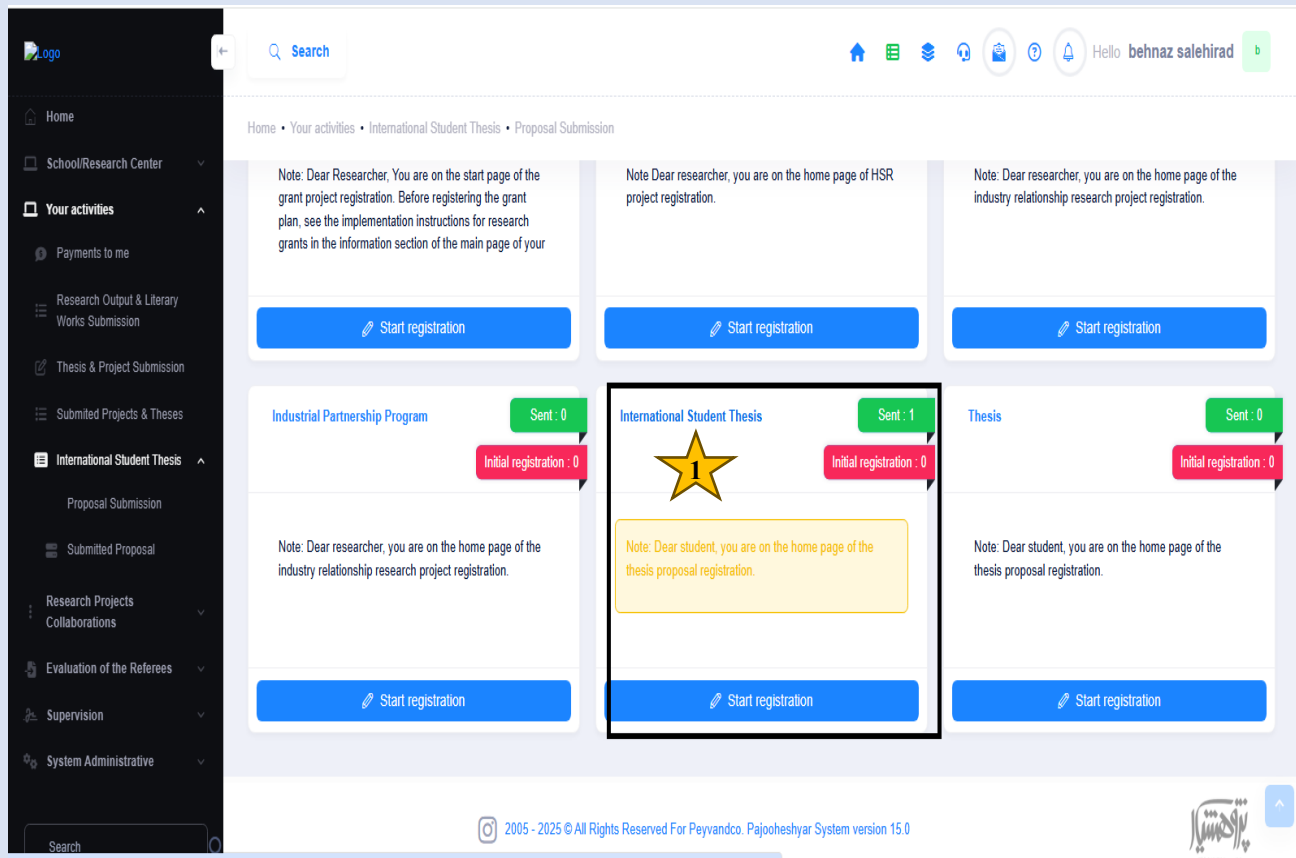

1 Go to your activities

2 Select International Students, Proposal Submission

Note 5: You can only have access to the system when you are in IRAN.

Note 6: If you need to do the research in your country, you have to make sure that you have received the ethical code, before starting your research.

 **Select **International Student Thesis** to start the proposal submission**

Note 7: If it is not possible and some how you need to go to your country (before getting the ethical code), you should give the username and password to a trustworthy friend / advisor / supervisor in order for them to make the necessary changes on your behalf.

step 2 Introduction and problem statement 53911: Association of Dietary inflammatory index and Healthy Eating Index with body composition Among Iran's Paralympic athletes with hemodialysis and hemophilia

Next step > < Previous step

Introduction - problem statement *

Background: An essential parameters of athletes that enhancing their fitness and success rate in sports career are Body composition and anthropometric indices (Bandyopadhyay, 2007) additionally perfect performance of athletes over a long and intense season is significantly influenced by training and dietary intake (Neposhtyeh et al, 2017). Body composition is affected by several constant factors such as inheritance, sex, age or ethnicity that has a fundamental impact on it, but the result is highly dependent on nutritional status, eating pattern and exercise training (Bandyopadhyay/2007, Nikolaidis and Karydis, 2011).

the associations between inflammatory diets and comorbidities, such as obesity, metabolic disorders, intestinal dysbiosis, Parkinson's disease, cancer, depression, and bone weakness have been observed in so many studies (Ghorbali and Afshari, 2008; Shokouhi et al., 2010; Mahdizadeh et al., 2014; Shamsi et al., 2016; Vafaei et al., 2018; Pourmohammadi et al., 2017; Esmaili et al., 2017; Mirzadeh et al., 2017; Mahdizadeh et al., 2017).

Definition of Words

Main, specific and practical goals *

testBackground: An essential parameters of athletes that enhancing their fitness and success rate in sports career are Body composition and anthropometric indices (Bandyopadhyay, 2007) additionally perfect performance of athletes over a long and intense season is significantly influenced by training and dietary intake (Neposhtyeh et al, 2017). Click to show or not.

- Before registering the personnel fee, the names of all the people who are going to receive the research fee must be entered in the "Moderators, colleagues" field.

- To register the personnel cost, it is enough to select the name of the person performing the activity from the list and type the type of activity and the total hours of his cooperation. Considering that two similar activities cannot be registered in the system, different activities must be typed for different people. If the activity of different people is exactly the same, the type of activity can be separated by inserting a number so that it can be registered in the system. In addition, the scientific degree and expertise of moderators and colleagues are automatically called from the profile information of people.

- If you only intend to register hours for a person for free, after choosing his name, select the option "Only to register hours" in the field of academic rank, and then enter and save the type of activity and hours.

Important points:

The maximum monthly work of research activities is 64 hours for academic staff members, 96 hours for academic research staff and 128 hours for technical staff.

The maximum monthly work means the maximum number of hours that includes all research activities and active research projects for a researcher per month. Accordingly, the limit of 64 hours is not only for one project per month.

The figures in the system are the maximum cost limit considered for each activity per hour, and the cost should be entered according to the actual amount of activities.

Please, the hours considered for each activity should be realistic and based on the activities in the implementation method, and according to the limitations of research credits, be recorded in an acceptable manner.

- All costs are in Rials. When entering all the costs of your plan, use only numbers without separators (, - /).

- Be careful in completing the quantity and unit price fields, because the final price of the material or device is obtained by multiplying the values entered in the two mentioned fields.

- The scale field is only for consumables, and here it does not only mean the unit of measurement of the material, but it shows the amount of material you need in the research. For example, 4KG, 3L.

Help Click to show or not.

You are on the page of your registered projects and theses: all your registered projects as a researcher or your registered theses as a student in any position are displayed on this page.

- If you have not registered your project or thesis, it is open for editing.
- If you have an edit request, you can send your request to the relevant official from the edit/edit request section and wait for the editing feature to be created.
- The draft/dissertation will have the ability to be edited by you only in the situations before the contract is signed.
- In different situations, by clicking on the + option in the details column, you can see the possibilities you have for each project or thesis, as well as its workflow.
- The options available in the "Filter by Position" section are embedded in order to facilitate your access to designs in different positions.

To reach your submitted proposal

To edit your information before the final step

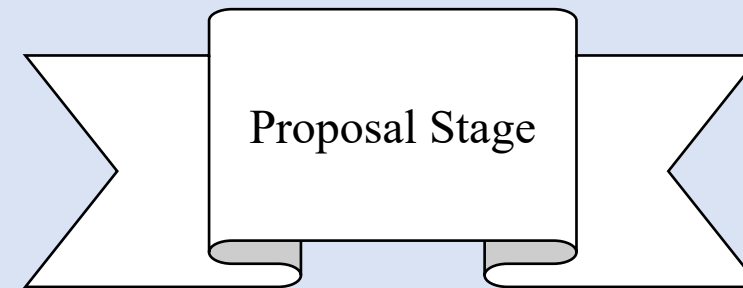

To check which stage the proposal is, in the system

Note 26: When you complete saving your proposal (step 17), the Edit icon will be locked.

Note 27: You can get permission for any necessary edition by sending a message to the admin of Pazhouheshyar at your school.

Note 28: Permission to edit the proposal is only allowed before receiving the ethical code.

The screenshot displays the 'Submitted Proposal' page in the Pazhouheshyar system. The interface includes a sidebar with navigation options like 'Home', 'School/Research Center', 'Your activities', and 'International Student Thesis'. The main content area shows a table of submitted proposals. A progress bar below the table indicates the stages of the proposal process: 1. proposal submission, 2. supervisor approval, 3. thesis management review, 4. ethics committee review, 5. ethics approval/rejection, 6. after committee's approval, 7. ready for contract, 8. thesis in process, and 9. end of thesis process. A yellow star with the number '1' is placed over the 'thesis management review' stage. Below the progress bar, there are two sections: 'category_5' with buttons for 'Full Body of the Thesis' and 'Show and Print the Consent Form', and 'category_1' with buttons for 'letters' and 'Show and Print the Consent Form'. A yellow star with the number '2' is placed over the 'Full Body of the Thesis' button. The footer of the page shows the copyright notice: '© 2005 - 2025 © All Rights Reserved For Peyvandco. Pajouheshyar System version 15.0'.

Number of days that the proposal is in this stage

To send a message to the Admin for necessary permissions

Note 29: If the proposal has been on stage 3 for a long time (more than two weeks), students must contact the admin of pazhouheshyar system.

Note 30: To get the ethical code, the proposal must be sent to the ethical committee as soon as possible. Therefore, **note 20** is very important.

The screenshot shows the 'Pazhouheshyar' system interface. The top navigation bar includes a search bar, user profile, and system status. The left sidebar lists various activities and submission options. The main area displays a table of submitted proposals, with a progress bar indicating the current stage. Stage 1, 'proposal submission', is highlighted with a yellow star. Below the progress bar, there are buttons for 'Full Body of the Thesis' and 'Show and Print the Consent Form'.

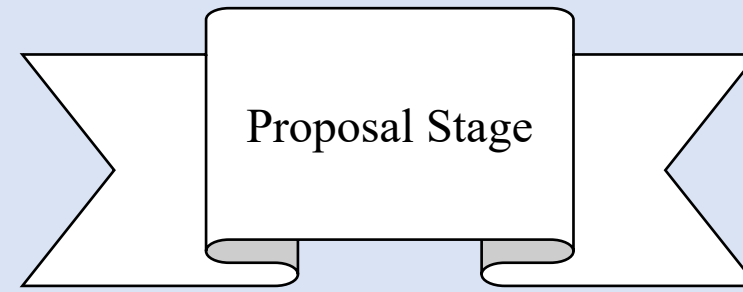

Details	Tracking Code	Research Code	Title	School/Research Center/Deputy	Position	Edit	Date	Ethics Code

Progress bar stages:

- 1: proposal submission
- 2: supervisor approval
- 3: thesis management review
- 4: ethics committee review
- 5: ethics approval/question
- 6: after committee's approval
- 7: ready for contract
- 8: thesis in process
- 9: end of thesis process

Buttons:

- category_6: Full Body of the Thesis, Show and Print the Consent Form
- category_1: [icon], letters

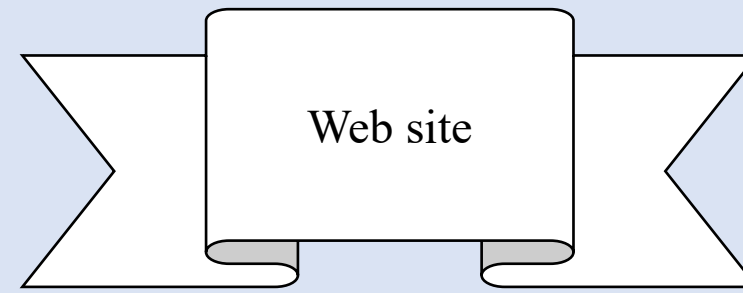

The stages of your proposal 1 to 9

Note 31: Make sure to check your pazhouheshyar often.

Note 32: When the proposal is at **stage 4** the ethical committee will ask questions related to your proposal, which needs to be answered as soon as possible. Therefore, you must check the pazhouheshyar regularly at this stage.

Note 33: The first message from the ethical committee will be: **“have you received an ethical code for this proposal from another committee?”**. Make sure to answer the question as soon as possible so that the other steps of approval can be done.
