

Graduation Steps:

- 1- Passing all theoretical & practical courses, laboratory AND hospital wards
- 2- Participating in Clinical Competency exam and having passing mark is one of the main items of graduation.

This exam is held twice a year and students in Internship Phase (preferably the last 6 months of this Stage) can take the exam. (Mandatory for MD students and not required for MBBS students)

- 3- Obtaining Total GPA of 12 from the basic sciences and pathophysiology Stage, and 14 from Clerkship and Internship Phase
- 4- Defending the dissertation

It is recommended that students come to the faculty education office one month before the Last ward to be informed details of the graduation process.
