

## Rules for changing Major

It will be essential and useful to follow the following points for students who intend to change their Major from MD to MBBS or MBBS to MD:

- 1: The change in each Major will happen only once
- 2: This process takes time, so students must register their application officially at the school's service desk at least 6 months before completing their studies. Filling the commitment form is also required.
- 3: Not having Internship phase is the ONLY difference between MBBS and MD.
- 4: MBBS students, like MD students, must participate in the comprehensive pre-internship exam, practical Objective Structured Clinical Examination (OSCE) is also mandatory.

MBBS students, like MD students, have to defend their thesis. Read the regulations carefully in the relevant part of our website or ask for guidance from the experienced official, Mrs. Akbari.

- 5: After obtaining the degree, it will not be possible to change it.
